

Our toys have been Nordic Swan Ecolabelled since 2010

dantoy is the first manufacturer of plastic toys to have its products certified to the Nordic Swan Ecolabel.

To qualify, dantoy must comply with requirements for health and the environment, as well as stringent requirements for chemicals.

Nordic Swan Ecolabelled toys do not contain phthalates, PVC or fragrances.

The Nordic Swan Ecolabel looks at the overall environmental impact and the entire product journey – for the benefit of people, the environment and the world's resources.

Important symbols of quality

Blue Marine Toys are made from maritime gear; nets, trawls and ropes from the fishing industry.

Made from 100% recycled, Nordic Swan Ecolabelled materials that is collected from our own in-house production.

Bioplastic toy, made of at least 90% sugarcane, a sustainable raw material, and our bioplastic is 100% recyclable. dantoy BIO products have the same qualities as our traditional plastic toys.

The "I'm Green" symbol from Braskem, may only be used after the amount of sustainable raw materials contained in the product has been verified. "I'm Green" PE (bioplastic) is made of at least 90% sugarcane (ethanol). Ethanol, a form of alcohol, is extracted from sugarcane, after which it is used to make bioplastic.

Plastic toys licensed for the Nordic Swan Ecolabel must comply with one of the world's strictest environmental certifications in the world. Ecolabelled products may not contain phthalates, synthetic fragrances or endocrine-disruptive substances. The entire life cycle of the product, from raw material to production, use, disposal and recycling, is included in the assessment, when drawing up the requirements for an ecolabelled product.

99% of dantoy's toys are manufactured in-house at our factory in Hobro, Denmark. Our goal is to produce 100% of our toys in Denmark.

All dantoy products comply with the European EN71 standard, meaning that our products meet all safety requirements for toys sold in the EU.

dantoy is certified to environmental standard ISO 14001, meaning that the company's environmental focus aims to minimise harmful environmental impact by using eco-friendly processes, controlling the consumption of energy, water and raw materials, recycling spills and waste, and upholding a healthy working environment.

dantoy is certified to quality standard ISO 9001, which ensures high uniform quality, high product safety, evaluation and retention of high quality, random samples and testing, as well as written procedures to ensure uniform production processes.

All dantoy products carry the CE mark, a key indicator of product compliance with the EU legislation that enables the free movement of products in the European market.

dantoy is licensed pursuant to "Der Grüne Punkt", a German eco-label implemented by Duales Systems Deutschland GmbH, to symbolise dantoy's collection and recycling of used packaging.

dantoy is a partner of Operation Clean Sweep, which is working for a cleaner environment and whose aims include reducing the discharge of plastic granules from manufacturing companies into the sea.

dantoy role-play items are approved for contact with foods. The product can be used for short time contact, for all kind of food.

All dantoy products are dishwasher safe. However, it is not advisable to wash products with labels in the dishwasher.

All dantoy role-play items (cups, plates, bowls, etc.) are microwave safe.

We generally label our products with EAN-codes.

BE AWARE that all single items in our large preschool sets are not individually marked with EAN codes, only on the outside of the cardboard box.

dantoy **focus**

mission

Supports the development of children in their universe. Bring joy and long lasting education and imaginative play experiences to children and their families through the “**dantoy-play**”. The natural way of playing and experiencing.

vision

To be the world' leading sustainable producer of toys regarding materials and the categories we work within. We want to build the dantoy brand to include the whole universe of the child.

The dantoy play experience: uncontrolled, natural, long-lasting play and sensory development

dantoy **DNA**

dantoy is a privately family-owned company, founded more than 50 years ago in 1964. We design and produce eco-friendly plastic toys, utilizing the latest technology and materials available.

The factory site covers 16,000 square metres (160,000 square feet) with round the clock production process. dantoy exports 80% of its total turnover to 55 countries around the world.

dantoy is conveniently located close to Aarhus, the second largest city of Denmark, and an important traffic hub and shipping port.

We are proud to tell that almost 100% of our catalogue range is Nordic Ecolabelled. This year we will launch a new product line made of recycled fishing gear, Blue Marine Toys.

At the same time, enriching play experiences is still our most important objective. We want to ensure the playfulness and creativity that exists within each of us in our processes and products. Even as we develop and manufacture new toys created within a framework of constant development of colours, shapes, health and the environment, dantoy's DNA always remains the same.

**“Long lasting, educational and
‘imaginative play experiences’”**

Residual product from sugarcane production

The processing of raw sugarcane into sugar creates a residual product that can be converted into ethanol and used in dantoy bioplastic. The sugarcane is crushed up to five times. The first two crush cycles produce “extract A”, which is used for sugar production, while “extract B”, which is thinner, is extracted by

adding water to the last three crush cycles. “Extract B” does not contain the pure sugar crystals that are necessary for sugar production. Instead, it is used to produce ethanol, which in turn is used to make bioplastic. For more information visit www.dantoy/BIO.

dantoy goals

- Develop products that support learning and development, made of sustainable materials and sustainable packaging
- Only use raw materials that fulfill the demands of the Nordic Swan Ecolabel
- Take sustainability of dantoy products into consideration already in the product development phase - we design for recycle.
- Ensure production sustainability by recycling production waste and through quality assurance
- Ensure production, material testing, efficient transport and delivery security by planning and logistics
- Develop educational toys where the quality is ensured through the choice of raw materials, production - and assembly process
- Minimize discharge of chemicals in order to preserve the drinking water supply through requirements for raw materials
- Minimize waste through planning and by filling up boxes and truck loads with less air when transporting parts for assembly
- Network with partners about development, waste management, maintenance and sharing knowledge.

Storyline

green garden®

From farm to table

Do you want to be a grill master or to eat an enormous amount of hot dogs? Do you want to cultivate a plant and grow your own vegetables? The "farm to table" theme in our Green Garden line of toys includes fun sets with vegetables, play food and tools for tending to your garden. The play sets invite fun moments with grilling, tea and breakfast gatherings or more active play with wheelbarrows, greenhouses, digging and raking.

The line comes with lovely soft colours. Green Garden's play sets invites children to be involved, to explore and learn about the day-to-day living situations that grown-ups are part of. Different skills are developed with Green Garden, including coordination of motor skills and fine finger dexterity.

Green Garden bears the Nordic Swan Ecolabel and meets the most stringent EU requirements for toys. We have our in-house production in Hobro, Denmark.

Green fingers, Green mind, Green Garden.

NEW LINE

The colours are inspired by sand, sea and corals

Blue marine Toys

made from recycled fishing gear

We are proud to present Blue Marine Toys – a line made from maritime gear which has been turned into toys with beautiful new colours. The colours for the Blue Marine Toys are very suitably inspired by sand, sea and corals.

Blue Marine Toys is an entirely new and exciting line of sand and water toys. The products in the line are made of plastic that comes from nets, trawls and ropes from the fishing and maritime industry. This range is a collection of products that together can be considered as part of a story. Products with a net-like structure, a mill, where sand runs through several processes – just like when the plastic materials are thoroughly sorted – lorries, which transport the maritime gear, and boats, which come from the oceans.

On a world scale, it is estimated that more than 12 million tonnes of plastic end up in the ocean every year. 10% of this, i.e. 500,000 kg – 1 million tonnes, is maritime gear such as nets, lines and rope*.

Our supplier of raw materials is a Danish specialist in converting recyclable materials into high-quality plastic materials. Before the raw materials are delivered to dantoy, they are tested in accordance with European standards. A description of the test of the raw materials is included in our ISO system as an assurance of the same high quality. dantoy would like to have this range bear the Swan Eco Label, but due to a lack of traceability back to the producer, this is currently not possible. This is a generic problem for recycled materials, despite the positive aspect of collection and recycling.

We have our in-house production in Hobro, Denmark.

Blue Marine Pull cart

dantoy wants to contribute towards sustainability, and Blue Marine Toys is a great fit with this goal. We collaborate with Grøn Cirkulær Omstilling** and make an extra effort as a company to prevent our own plastic production from ending up in nature and/or the oceans. This is an initiative we share with our supplier.

By recycling materials from the obsolete maritime products and giving them new life, dantoy contributes towards a healthier ocean environment, for our benefit as well as the benefit of future generations.

We thus contribute preventively to ensure that fewer maritime products end up in the oceans.

Blue Marine Toys meets EN71-3, -9 and -11 and ASTM963.

creating clean life toys

Say hello to **GREEN BEAN** toys

Our toy is constantly evolving, and we are continuously working on discovering uses for alternative materials.

The concept of Green Bean is about re-thinking, renewing and recycling something you already have. We reduce the impact we have on the climate by using our own internal excess residual materials from our production. The unique sustainable toys are therefore 100% recycled.

The colour nuances of the toys are generated from the mixed plastic waste which is available at that time, and this makes Green Bean a limited edition line that continues to surprise.

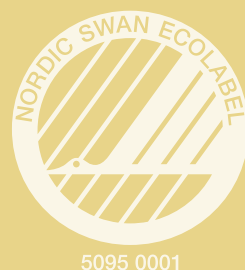

The colour nuances will vary from set to set.

Green Bean bears the Nordic Swan Ecolabel and meets the most stringent EU requirements for toys. We have our in-house production in Hobro, Denmark.

toys for early learning

tiny[®]
by dantoy

Our TINY line is designed for babies and small children. The concept is intended to contribute with colours, shapes and functions, which develop the child's senses, coordination, concentration and motor skills. The colours of the products are made in soft, light shades which are pleasing to both children and adult.

The dantoy TINY line of toys is made of bioplastic. The material is based on sugarcane, and is a residual product from sugarcane production. Our BIO products bear the Swan Ecolabel and are produced in Denmark. We greatly emphasise safety, which is ensured through meticulous procedures and certificates.

TINY bears the Nordic Swan Ecolabel and meets the most stringent Global requirements for toy, which means kids of all ages can use our products oral. We have our in-house production in Hobro, Denmark.

TINY growth, TINY steps, TINY BIO. A child's world – the sustainable TINY.

THORBJORN®

The wonderful and magical world of Thorbjorn includes sets of ice cream and cakes, which are part of the story of the hidden, magical crystal. The children can make delicious frosty desserts or play hide and seek with the magical crystal.

The Thorbjorn line is growing, and the magical story continues with sets of cars, aeroplanes and boats. The tea and coffee sets are perfect for fun parties, which can be combined into an imaginative play experience. Which of Thorbjorn's friends do you want to be?

The Thorbjorn line bears the Nordic Swan Ecolabel and meets the most stringent EU requirements for toys. We have our in-house production in Hobro, Denmark.

Imagination is key - imagine with THORBJORN and his friends.

Story time

A very special polar bear named Thorbjorn, lives in the cold snowy ice-filled landscape with his best friend Pete the Penguin. Together they make delicious homemade ice cream from secret recipes.

Thorbjorn sells the ice cream from his small cart.

The secret about his ice cream, is that he gets help from a magic ice crystal. With that he makes the best frozen desserts in every flavour you can imagine.

Thorbjørn Ice cream set

L:28 H:17 W:18 cm

They set out right away to visit those who bought ice cream and after looking for the magical crystal all day with no results, they go back to the ice cream cart as the sun is setting in the town Frostby.

hide n' seek

6957

Thorbjorn Sand- and cake baking set

Thorbjorn is very sad because he cannot make his splendid delicious ice creams and pastries without his magical crystal.

Imagination play
Build your own story together

ice cream land • crystal • gameplay

With one blueberry pastry left, Pete the Penguin gives it to Thorbjorn to cheer him up and something unexpected happens. In the middle of the pastry a shiny crystal is found.

Rumour has it that a number of magical crystals have been lost over the years, so perhaps you are lucky to find one just like Thorbjorn's!

THE END

Thorbjorn Cupcake and ice cream set

With colouring book

for my little
princess™

Once upon a time

The concept of For My Little Princess is a world where boys' and girls' imagination can come to life. A world where colours are based on tones of pink and lavender. Boys and girls can immerse themselves in roleplaying with food, ice cream and cakes, and they can host lovely parties with tea and coffee – and of course lavish breakfast menus.

It is one of the oldest lines in the dantoy range of toys, and it is still expanding. For My Little Princess bears the Nordic Swan Ecolabel and meets the most stringent EU requirements for toys. We have our in-house production in Hobro, Denmark.

Dinner time

for my little princess

The recognisable Classic line is characterised by primary colours yellow, blue, red and secondary colour green. An attractive colour choice which strengthens children's ability to recognise colours and shapes. The Classic concept comes with a great variety of play sets and the opportunity for children to mimic the everyday situations of adults.

The Classic line of products extend over a large group of toys, with many large sets, especially intended for kindergartens. Role-play items are strongly represented in our Classic range. The toys are great for both indoor and outdoor play in all kinds of weather, where nature and the child's senses can be explored. Classic bears the Nordic Swan Ecolabel and meets the most stringent EU requirements for toys. We have our in-house production in Hobro, Denmark.

SWAN ECOLABELLED
BIO PLASTIC
MADE FROM SUGARCANE

SWAN ECOLABELLED
PLASTIC IN LINE
COLOURS

The BIO concept consists of toys produced of green materials – i.e. the residual product of sugarcane, which is 100% recyclable.

The playset colours are muted shades with light tones. Our line of BIO toys are suited for play indoors as well as outdoors in all kinds of weather – including rain, snow and sunny trips to the beach.

Quality and durability are in abundance, but with green BIO materials, dantoy takes a step closer to green production and a better, more sensible environmental perspective.

Our BIO line bears the Nordic Swan Ecolabel and meets the most stringent Global requirements for toys. However, this comes with the reservation that selected products may be made of a different green BIO material since dantoy is always on the lookout for new sustainable materials.

We have our in-house production in Hobro, Denmark.
