Prevent OVERHEATING

More and more awareness is created about overheating. And that is good news. But how do you explain your customers and consumers why Dooky is safe and other 'solutions' probably not?

Situations creating overheating

Research has shown that it can become dangerously hot in a pram or stroller when it is covered with a (thick) blanket. Some brands have hoods which cover most of the baby. They do protect against the sun. However, as these hoods are synthetic and not breathable, they create a very hot environment. And many consumers still have the old habit of covering their baby with a muslin. Although muslin cotton seems more breathable than thick blankets, they do not prevent overheating and offer no protection against UV radiation which may cause babies to suffer from sunburns.

The solution

The registered design of Dooky is the answer. It creates a peaceful environment for a baby. It can be rolled up and down so when the baby is asleep it is darker. When rolled up slightly, extra ventilation can be created, and parents can keep eyecontact with their baby. When rolled up when the baby is awake, it keeps direct sunlight out of the baby's face.

Another advantage: sun protection

In addition to the above solution, Dooky can also be used as sun protection.

The big advantages compared to traditional parasols:

- No need to adjust the parasol when you change walking direction: Dooky always blocks direct sunlight.
- Dooky is not affected by winds. On windy days, umbrellas are a nightmare to use.
- Dooky has an UV Protection Factor (UPF) of 40+, which is rated as Excellent UV Protection.
- Dooky creates a dark impulse free environment.

Stroller

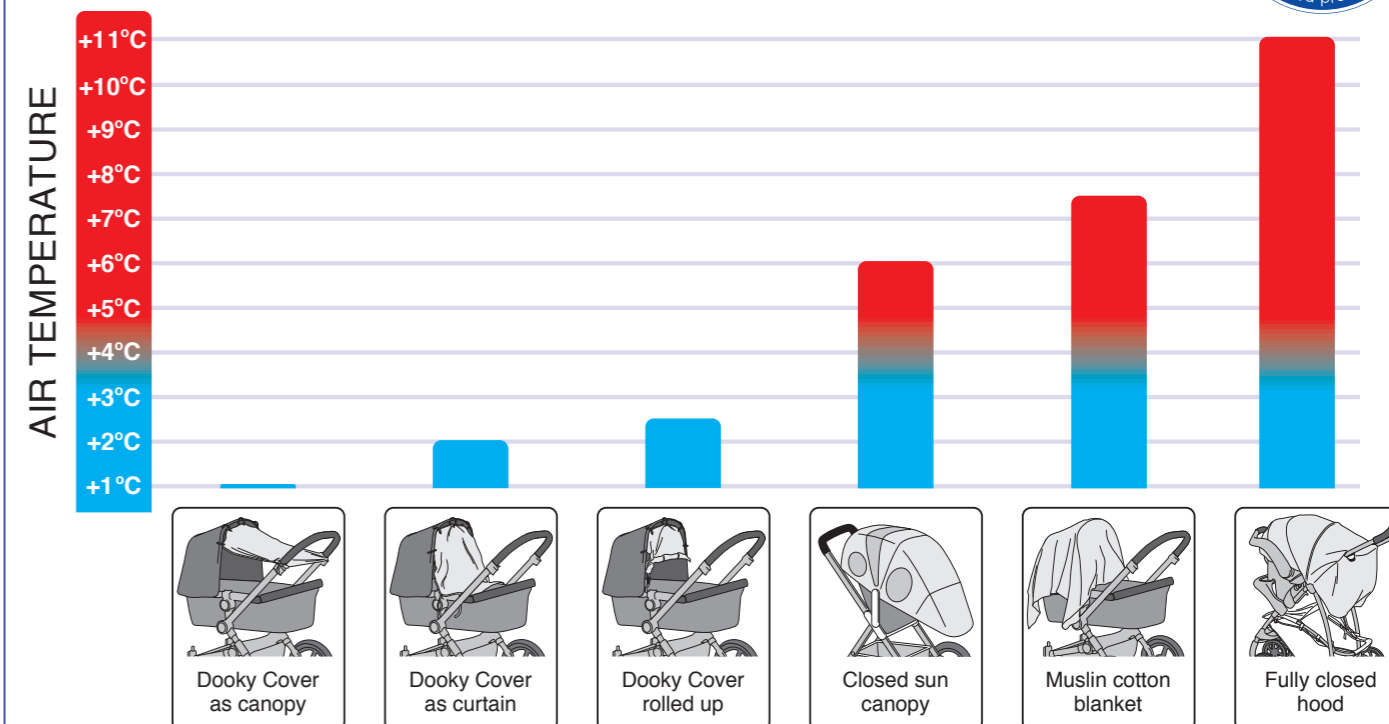

Infant car seat

Buggy

Test performed by TÜV Nederland. Commissioned by Stichting Veilig Kind.

Measured temperature shows the maximum increase of the air temperature when using various methods commonly used to protect a baby against the sun.

WARNING: Without any sun protection, tests show the object measures an increase in temperature by 8 degrees.

+8°C

SIGNIFICANCE OF THE TEST:

- Muslin/ hydrophilic cotton blankets offer no UV protection
- So called sun canopies show increase of temperature
- Dooky Cover is a reliable solution to the above

Visit www.stichtingveiligkind.nl for more information and full TÜV test report.

With the Original Dooky you can easily create a quiet and peaceful environment for your child without being bothered by light, wind, sun, noise, light rain and other surrounding influences. The Dooky is universal and easily fits in seconds to any **infant carrier**, **stroller** and **pushchair**.

Because of its unique and registered design, the Dooky is easily adjustable in height. Simply roll your Dooky up and down using the Velcro strips, keeping the sunlight away from your child's face. When your child is asleep, simply roll it all the way down to create a dark and quiet environment. With the additional strings on the bottom you can easily fasten the Dooky, ensuring it is not affected by strong winds.

- **Universal:** fits in seconds easily to any infant carrier, stroller and pushchair
- **Easy adjustable** in height, simply roll your Dooky up and down
- **Protects** your child against sun, wind, light, cold, noise, light rain
- **100% breathable cotton** creates sufficient ventilation

Dooky is hand washable and has an excellent UV-protection factor of UPF40+, which will block over 95% of harmful UVA and UVB rays.
